

Biostatistician Job Summary

Stat One LLC is looking to hire a biostatistician for our office located in Research Triangle Park area in North Carolina. Stat One is a CRO supporting clinical trials for pharmaceutical, biotechnology, and medical device companies. We provide statistical consulting, programming, and data management services to our clients. Our goal is to provide quality services in a timely and efficient manner. Great opportunity for master's level individuals out of school to build a solid foundation in statistics and the clinical trials industry.

Statistician Primary Responsibilities are:

- Develop and review Statistical Analysis Plans (SAPs).
- Review statistical output such as data sets, tables, listings and figures.
- Determine study design and statistical methodology to be used for study.
- Review protocols and CRF design.
- Perform sample size calculations and prepare randomizations.
- Program data sets, tables, listings and figures as directed.
- Serve as lead project statistician and point of contact as requested.

Job Qualifications

- Master's degree in biostatistics, statistics, or other related scientific fields
- SAS Programming Knowledge
- Strong Attention to Detail
- Excellent Communication Skills
- 1-3 years experience preferred
