

Case Study #1 - Right Expertise for Diagnostic Study

Let Your Data Grow®

- **Challenge:** We were asked to review a Statistical Analysis Plan (SAP) written by a statistician at a CRO. Upon review, it was apparent that the author did not have the appropriate background or experience for the type of study.
- **Solution:** A Stat One statistician performed targeted updates to the SAP and explained the reasoning to the original author and clinical team.
- **Result:** The SAP was successfully updated, and the project was able to move forward.
